

GUIDELINES FOR HIGH SCHOOL CREDIT FOR PROFICIENCY IN THE AREAS OF MATHEMATICS AND WORLD LANGUAGES

HIGH SCHOOL PROFICIENCY CREDIT SPECIFICATIONS

Junior high and middle school students may be eligible to earn high school credit for high school courses completed as part of the junior high or middle school programs and taught by qualified junior high and middle school staff members.

Proficiency credit for courses taught in junior high and middle school is limited to one credit in Mathematics and one credit in World (Foreign) Language. Credits earned by proficiency will apply toward graduation requirements. Students earning proficiency credit in world language are strongly encouraged to continue their studies rather than replace such opportunities with the proficiency credit.

In addition, once enrolled in high school, students earning proficiency credit must meet all other graduation, course load, and grade level requirements that apply.

CRITERIA TO RECEIVE CREDIT CLASS OF 2021 OR LATER

Students must meet all of the following criteria:

- Complete the entire junior high or middle school course which includes that course content identified by District 99 as core or essential.
- Earn a first semester average of 60% or higher in the subsequent course level as a District 99 freshman.
- Ensure that official junior high or middle school records of course completion are available upon request.

Students who do not meet all of the above criteria will not be granted high school proficiency credit. No partial credit will be granted.

COURSE REPEATABILITY

Students who are granted high school credit through proficiency (World Language and/or Mathematics) are ineligible to repeat courses in which proficiency has been previously demonstrated.

CREDIT LIMITATIONS

1 credit in Mathematics, 1 credit in World (Foreign) Language

HIGH SCHOOL TRANSCRIPT IMPACT

Students who earn proficiency credit will not receive a letter grade on their high school transcript
